Prague, August 12th, 2015

Dear Sir,

I am announcing my candidacy for the EAAE Council member, within the elections that will take place in Milano on August 30th, 2015.

I believe the European Association for Architecture Schools is on a crossroad. The turbulent times are hopefully over, thanks to the performance of the previous Council. We must continue in the established course. Crucial steps need to be done in the future years – how to create a professional institution, that takes active part in the discussions on architectural education -- how to raise the number of schools with EAAE membership – how to better communicate with the affiliated schools – how to promote the role and benefits of EAAE -- how to attract young people to the Association.

These are among the issues of 2015. I am seeking the seat in the Council to contribute to this process.

In the past years, I have been serving the Faculty of Architecture CTU on different levels, at the same time I have been working as an active architect. My candidacy is based on the conviction that I can use the experience from both the academic and practical field for the sake of EAAE. I intend to do my utmost to see, that the EAAE retrieves the role of a united and respected institution in the field of architectural education.

With best regards,

Dalibor Hlavacek
Faculty of Architecture
Czech Technical University in Prague

CURRICULUM VITAE

Ing. arch. Dalibor Hlaváček, Ph.D.

Name	Ing. arch. Dalibor Hlaváček, Ph.D.
Date of Birth	13. 12. 1976
Address	Faculty of Architecture, CTU in Prague, Department of Architectural Design II, Thákurova 9, 166 34 Prague 6, Czech Republic
Contact	+420 777 165 450, dhlavacek@fa.cvut.cz

An Architecture graduate at the Faculty of Architecture at the Czech Technical University in Prague (2003). Between 2001 and 2002 he worked in the Renzo Piano Building Workshop in Italy, between 2003 and 2008 in an architectural studio Hlaváček & Partner. He is a co-author of a number of award-winning buildings. In 2010 he achieved a doctoral degree at the FA CTU in Prague (doctoral thesis „Natural materials in architecture“). Between 2011 and 2013 Dalibor was the coordinator of the Team Czech Republic at the international student competition U. S. Department of Energy Solar Decathlon 2013, the most prestigious university competition in the field of sustainable solar architecture. Under his leadership, the team of the Czech Technical University fought its way into the finals as a first team from the Czech Republic in the entire history of the competition and won the first prize in Architecture, second prize in Technology and third prize overall.

Dalibor is a head of an Architectural Design Studio on the Faculty of Architecture on the CTU in Prague, which is focusing on sustainable architecture and holistic approach. Since 2011 he is a member of Academic Senate of the Czech Technical University in Prague. Dalibor is an authorised architect, member of the Czech Chamber of Architects (ČKA).
