VILNIUS – THE CAPITAL OF GLACIER MARGIN (OLD TOWN OF VILNIUS FROM A GEOLOGICAL POINT OF VIEW)

Three-hour hiking lecture on the prehistoric geological formation of present-day Vilnius landscape by JONAS ŠEČKUS,
Doctor of Science in Geology, Lithuania

We invite you to a geological journey through the Old Town of Vilnius. This time we will tell you the natural history of the development of Vilnius. Every city dweller who passes by the Cathedral, climbs the Three Crosses or Gediminas Hill knows and remembers the historical ups and downs of our capital, but a long time ago (when there were no people here), wandering things happened there. Our natural fortress was built by nature - relatively long time, very creative and unique. We need to meet and talk about what happened in the past and understand the recent urban development and economic activity, what challenges await us and what we can calmly adapt to.

10 April 2025 13:00

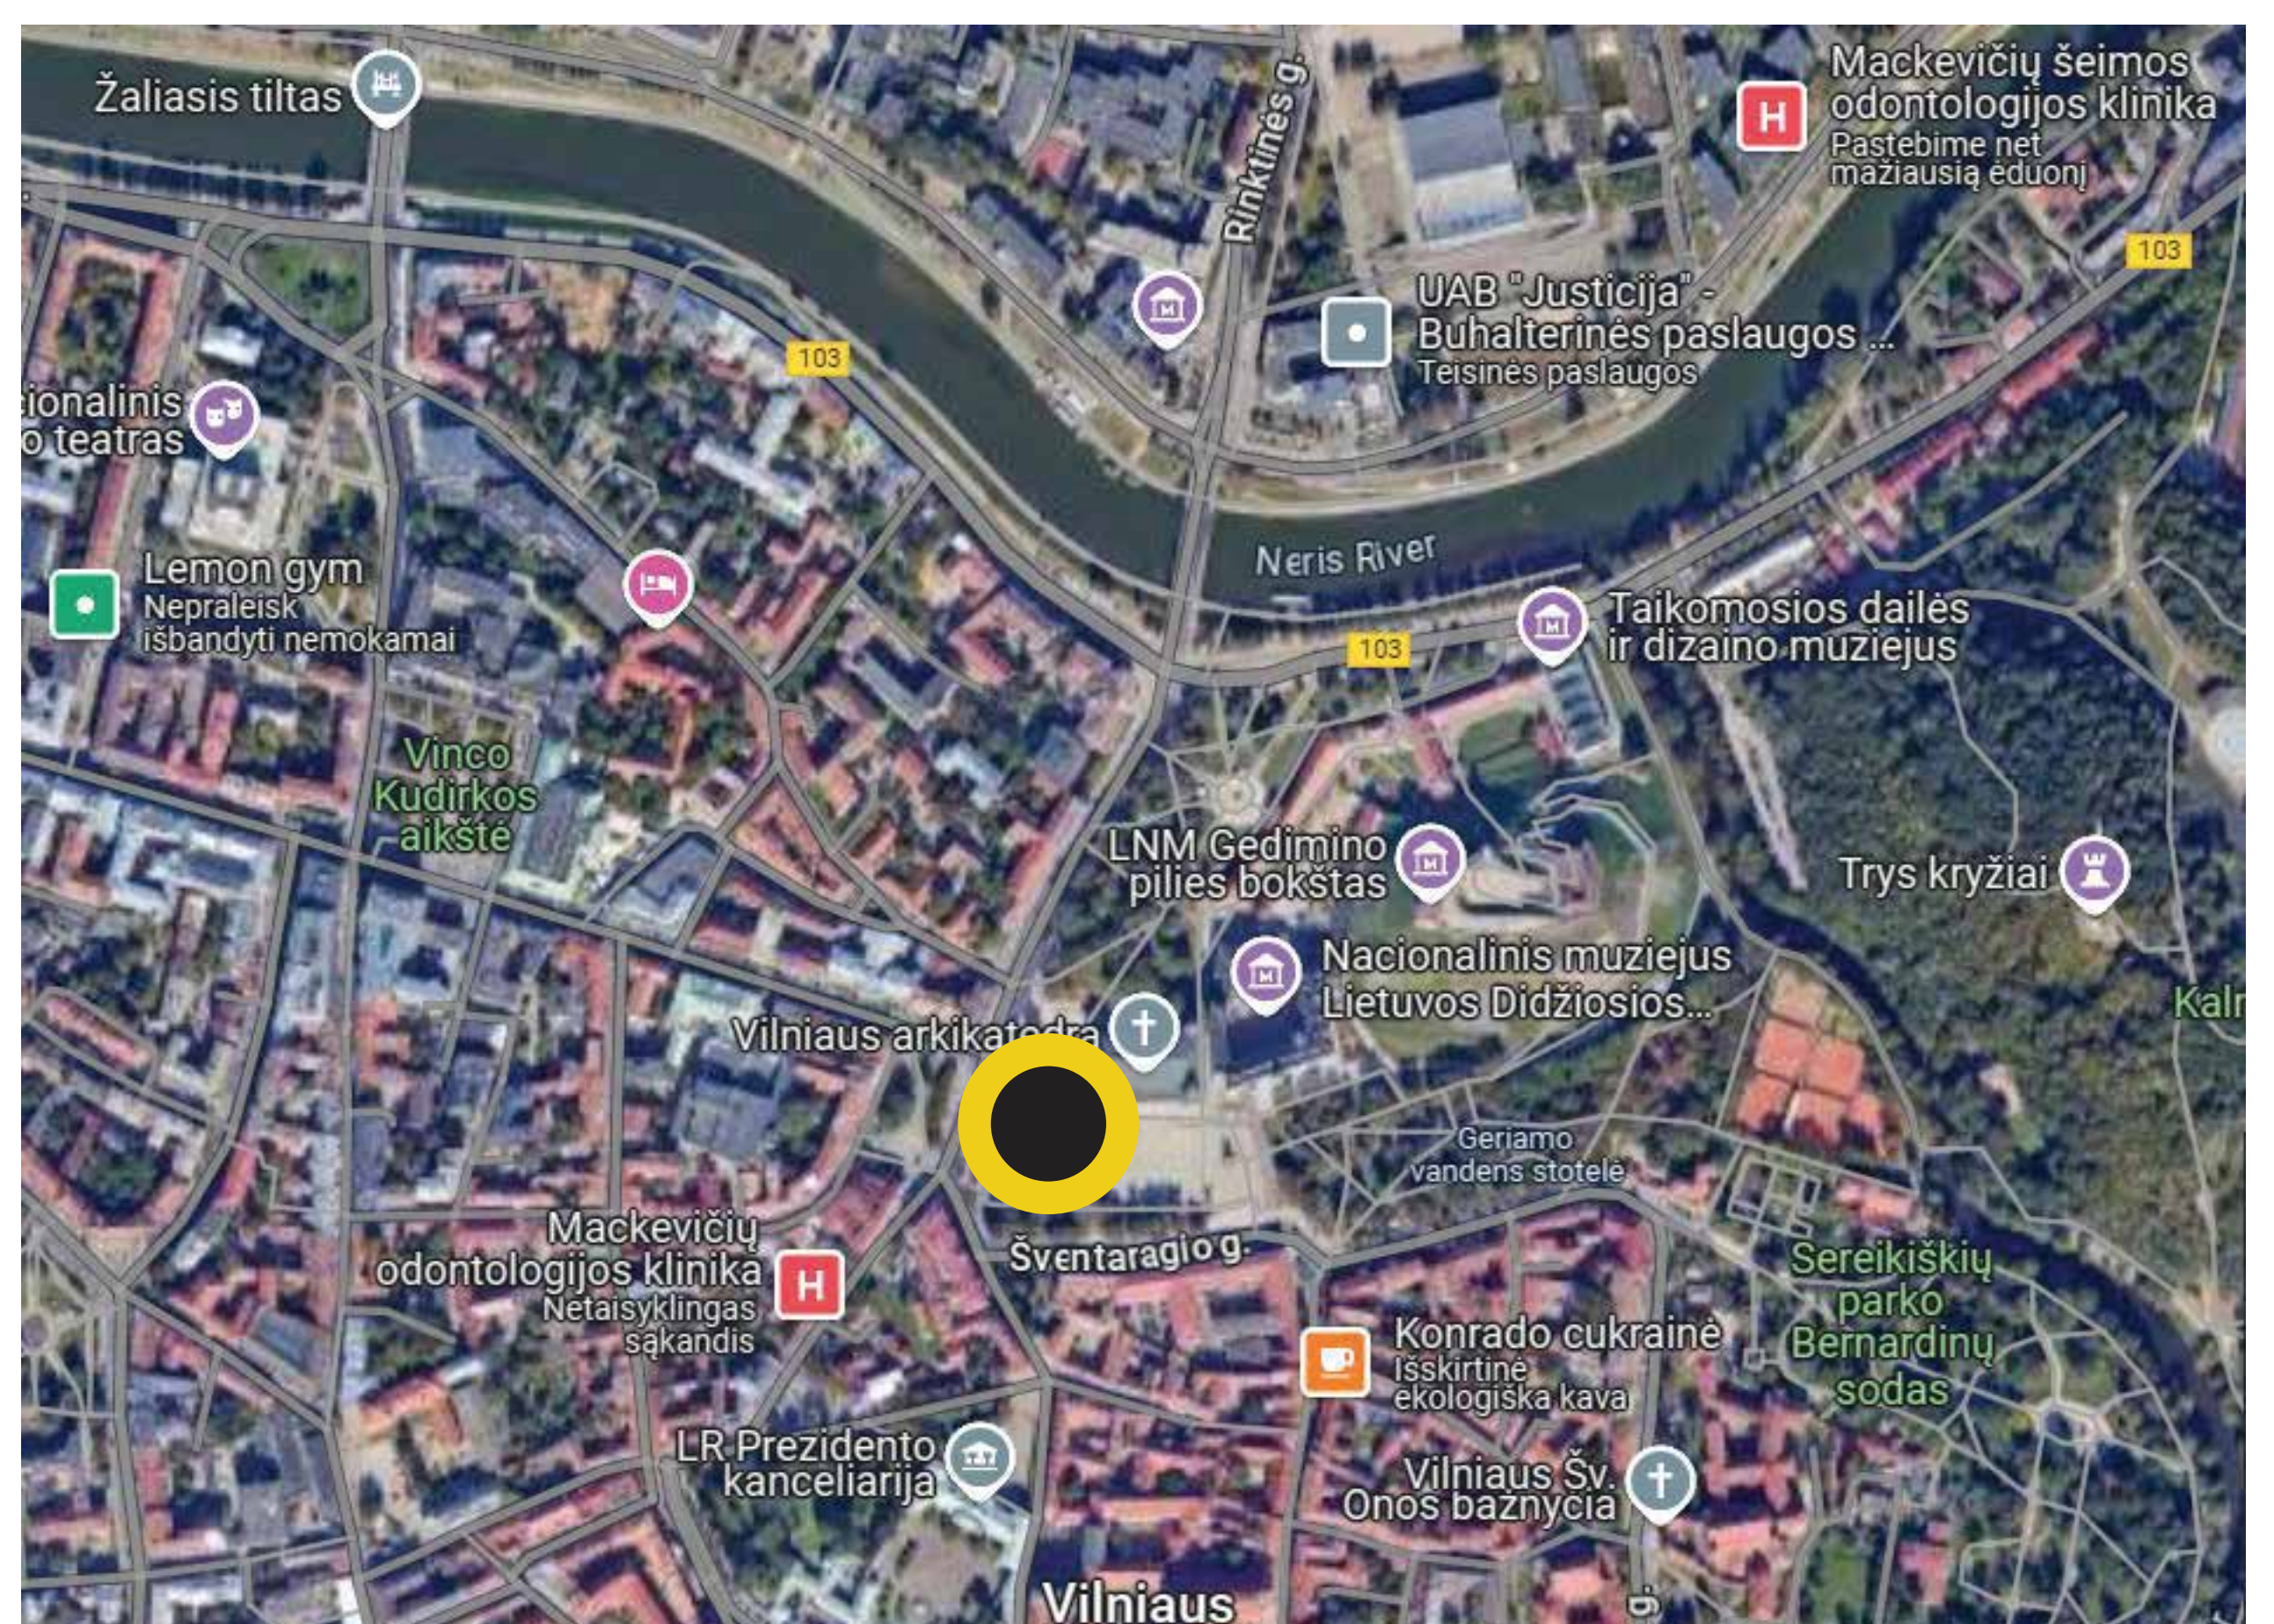

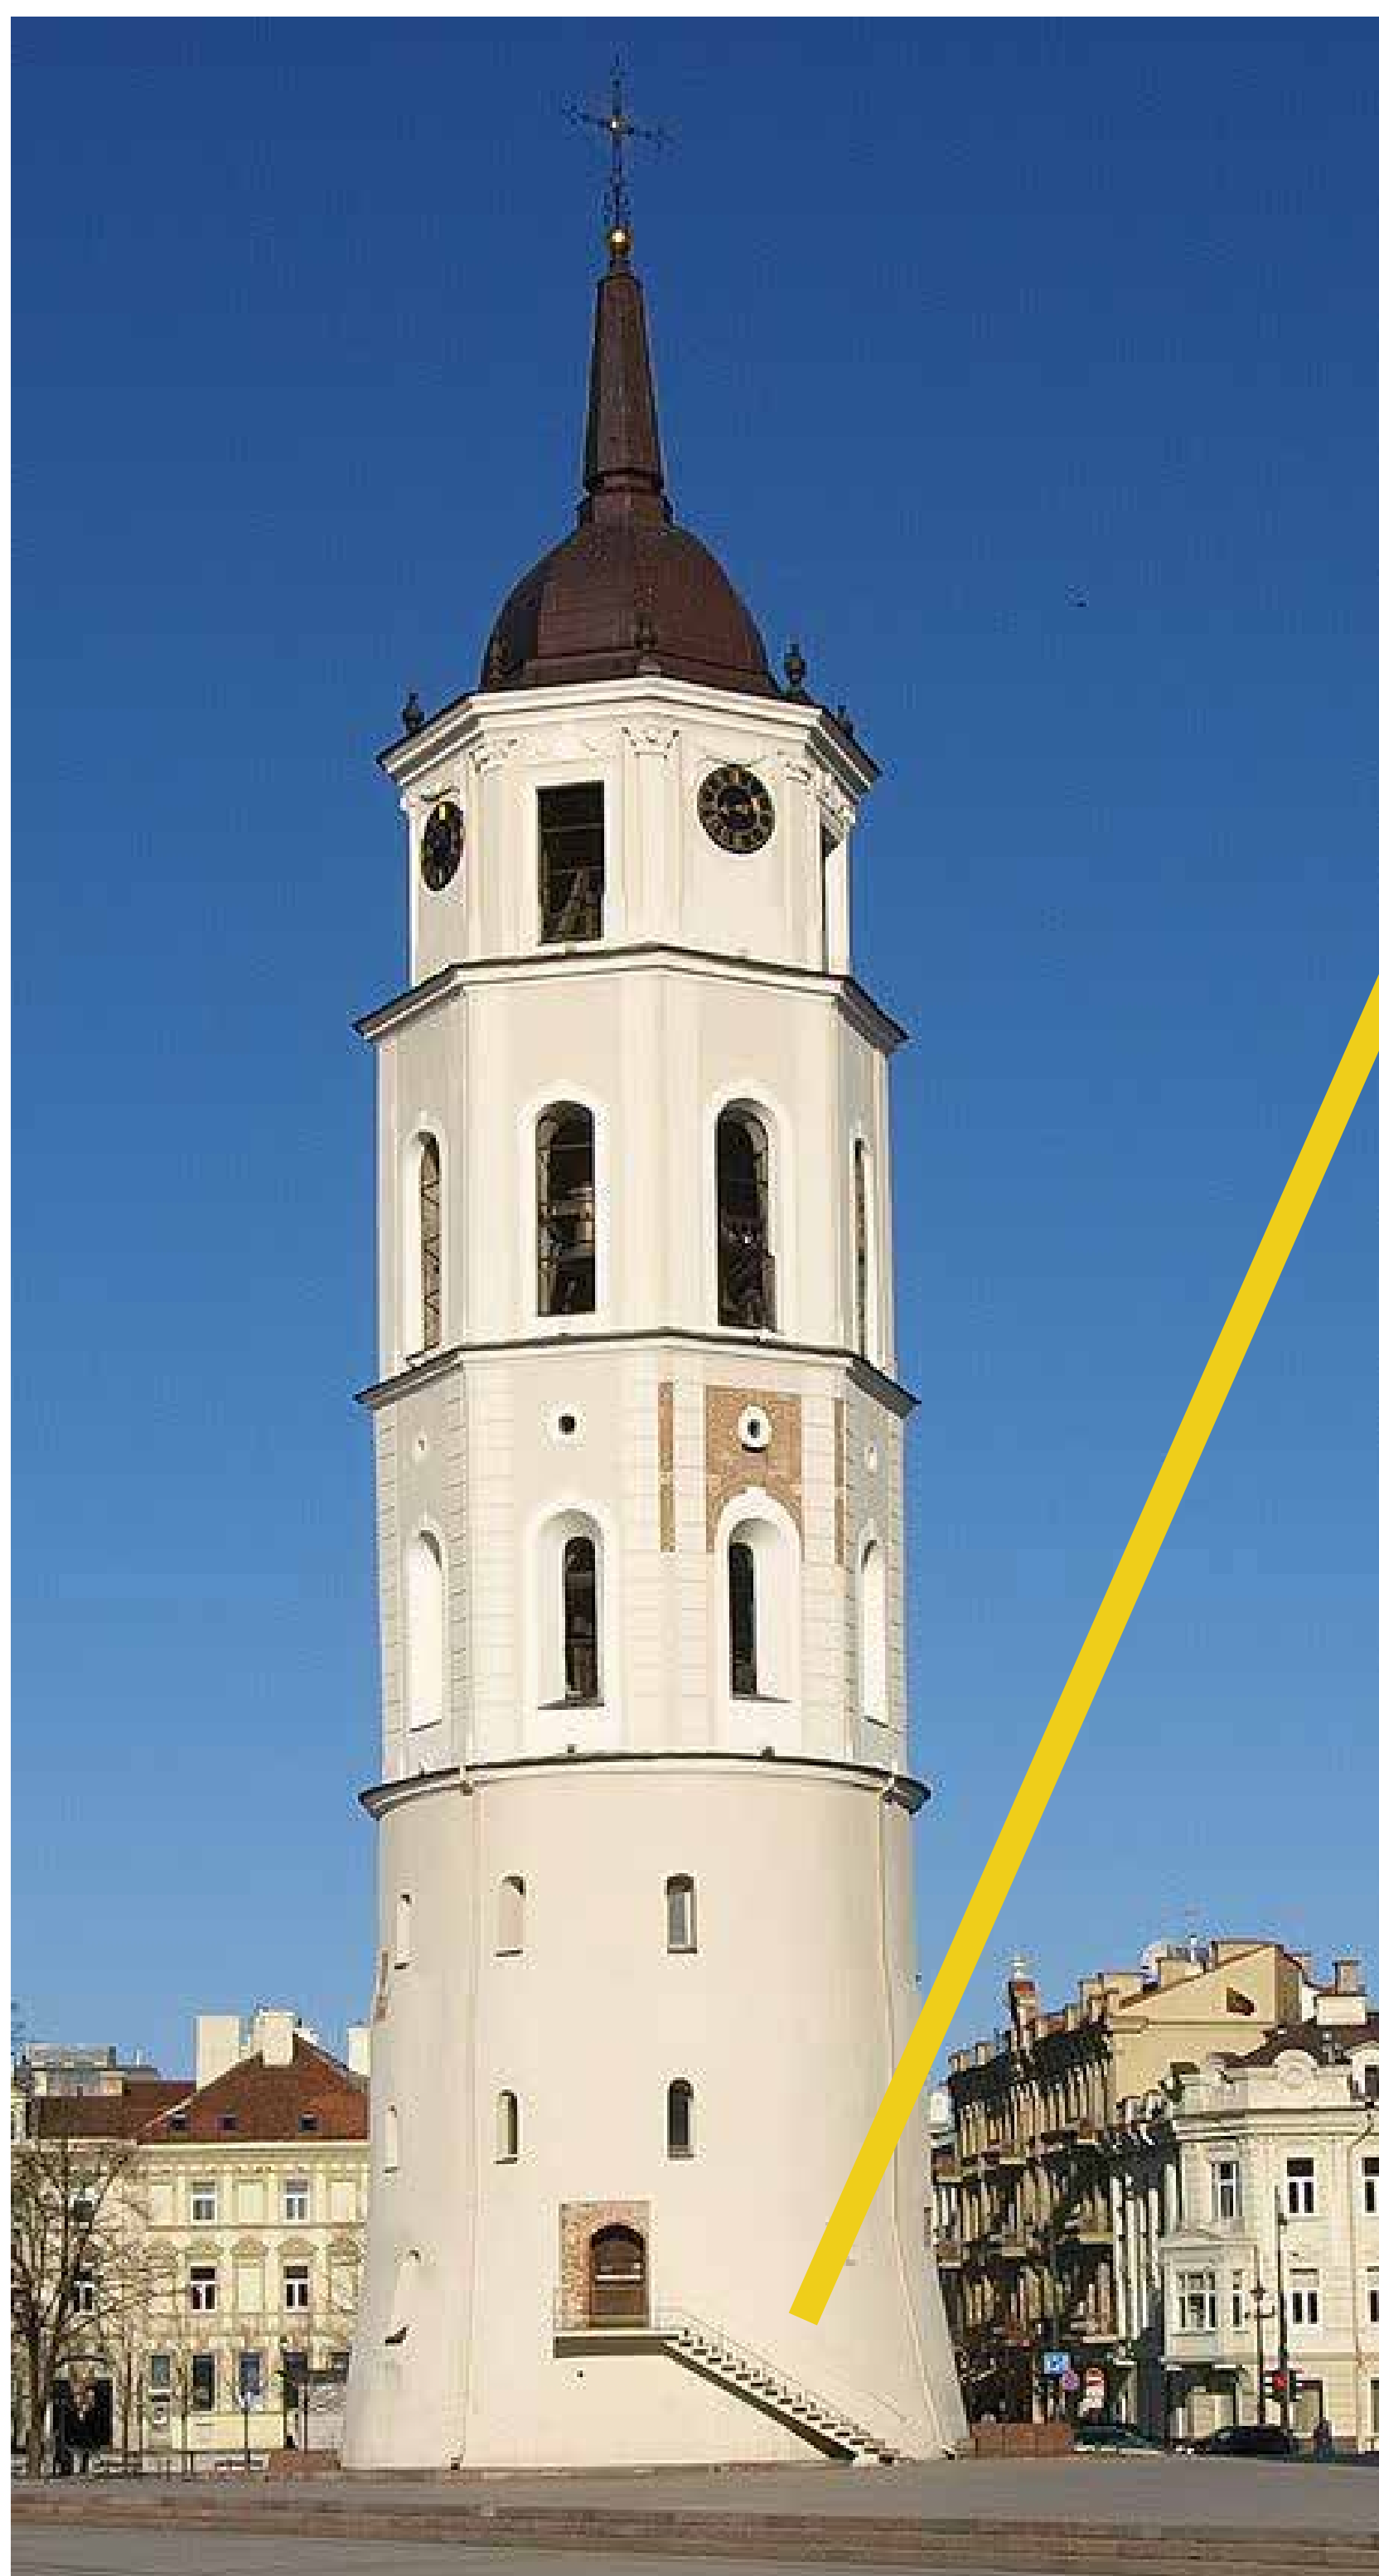

Meeting point:

Vilnius Cathedral bell tower – look for the stairs

(Katedros a. 1, Vilnius 01143)

Duration: 3-3.5 hours

Distance: 5 km

Weather conditions and clothing:

Please dress warmly and comfortably as it is currently quite cold and windy in Vilnius (+4 °C during the day, -4/5 °C at night)

Contact person: Dalia Dijokienė, Dean of the Faculty of Architecture VILNIUS TECH, +370 650 67897
